December 1999

What's new at b & g!!!

New product releases: 3 new pumps and the Add-A-Zone relay!!! The **NRF/NBF-33** offers better hydraulics, high starting torque, and the time proven DuraGlide bearing assembly. This system lubricated pump is competitively priced against Taco's 0010 model. Why would you chose B & G over Taco?

- 3 Year Warranty
- B&G's integral design vs. Taco's 3 piece design
- Debris protection & stainless steel rotor sleeve.
- 100% lead free bronze, for safer consumable water.

The **PL-55 & 75** are superior alternatives to large wet rotor pumps. The PL-55 offers high head performance while the

The new Series PL pumps.

PL-75 proves higher flow rates. The PL-55 replaces **2** UP26-116 or UP26-99 Grundfos pumps. The PL-75 replaces the UPS40-40 low or high & the TP32-40. With it's maintenance free operation and powerful rugged design this pump is by far superior. The

Add-A-Zone pump relay can be used on any type of application where a 24V control signal is being used to turn the pump off and on. It allows quick snap on installation on any NRF/NBF and 1/12 HP & 1/6 HP PL booster. It's ready to turn on the pump and send a signal to the aquastat to fire the boiler. The controller can be daisy-chained together to form up to three zones. Standard warranty of 5 years.

American Made, Union Made

Did you know that Bell & Gossett manufactures their pumps in Morton Grove Illinois? Did you also know that they are an ISO 9001 manufacturing plant? And did you also know that B & G is the only manufacturer of a 100% American made, union made pump? What does this all mean to you?

- Higher quality standards
- Factory hydraulic tests
- Value engineering
- Consistent manufacturing
- American pride

B.J. Mulcahy has currently bumped up their stock levels on Hoffman Specialty items!! So, when you have a steam trap that needs replacing don't forget to give us a call.

Thermostatic traps - The 8C, 9C and 17C traps are upgraded to use all stainless steel cage type elements and carry a 3 year warranty. Similar elements, to retrofit Spirax/Sarco, Barnes & Jones and Mepeco traps, are also available. The 8C and 9C units are now capable of up to 125 psig, from 25 psig previously.

F&T traps - are upgraded to use all stainless trim. Capacities are realigned to meet Spirax Sarco. Pricing is realigned to meet competition published prices. Cover assemblies to retrofit Spirax/Sarco traps up to 1 1/2 inch are also available. In February 1996, we introduced the new **Series I Inline traps** in sizes up to 1 1/4 inch. The Inline traps eliminate piping offset for tight situations. The Series I traps compete directly with Spirax/Sarco inline F&T traps. The inline traps also provide a replacement for Illinois type G and TLV free float F&T traps that only have a small offset between the inlet and outlet.

Inverted Bucket traps - are upgraded to use all stainless trim. The new Series B inverted bucket traps offer capacities to match Spirax/Sarco. Optional strainers and thermic vents are available on Models B1, B2, B3 and B4.

We are proud to put our new Bear Traps to the test against major competitors. We know they are the best on the market, with many unique and valuable features. Our F&T's feature 4 port piping. Our thermostatic radiator traps offer unique swivel connectors and money saving replaceable elements. The stainless steel thermostatic elements are offered with a three year warranty. All Bear Trap® products have stainless steel trim.

NEW Maintenance FREE SERIES 60 PUMP

Introducing the all new **Maintenance Free Series 60 Pumps!!** This is an all-new pump from the ground up and represents many months of dedicated effort. What does the new Series 60 possess that the old design did not?

- Permanently lubricated maintenance free ball bearing frame.
- Permanently lubricated maintenance free B & G ball bearing motor.
- Significantly improved hydraulic performance and operational efficiency.
- Two new pump sizes.
- A cast bronze impeller.
- Major component interchangeability.
- Quiet smooth span of operation.
- A **3 YEAR WARRANTY!!!**

Parts, parts and more parts!!!!

"It ain't the same".... Not all parts are the same. Recently we were reminded of the importance of original factory parts, corporate ethics and quality customer service. The Illinois courts levied a \$1.2 BILLION judgment against State Farm Insurance because they required body shops to use non-original substandard "aftermarket" parts, saving a few bucks at the expense of the customer. Imitation or bootlegged parts exist and promote their interchangeability with parts from the original manufacturer. But, manufacturers of imitation parts do not have access to all the original engineering drawings and specifications, nor do they understand or care about the fine details of the design or its intent. Imitation parts don't allow the pump to perform to the original factory standards. They cause the pump to cavitate, decreases the efficiency, creates inlet turbulence, reduces performance and shortens the pumps life. Protect yourself and your customer.

REMEMBER: IF YOU USE NON-B & G PARTS THE B & G PUMPS LOSES IT'S UL LABEL AND IT'S WARRANTY!!!!

GET REAL..... GET B & G...THE ORIGINAL
